Professional Experience

Woody Bibens & Associates, President & Owner, 1988 – present

Woody Bibens & Associates (WBA) has a proven record of providing innovative, professional association management and project management services for 24 years, on a referral basis. Leading with a vision for the future, proven leadership & organizational development skills, WBA has a successful record of growth with each client.

Most recently WBA launched the National Green Centre (www.nationalgreencentre.org) in January 2011 for it's longtime regional client, the Western Nursery & Landscape Association, influencing the nursery & landscape industry on a national level. Development of strategic objectives, budgeting to meet goals, partnership building from a local to a national level, managing communication in a changing environment, creating innovative programming, organization, efficiency, leadership, the highest integrity, and focusing on the future are what we at WBA have built our reputation on.

With a keen interest in renewable energy WBA stepped into the wind industry in 2008 as a consultant for Midland Steel Company in an effort to gain entry into the wind energy supply chain.
